

Data Link Operations Manager

Little Rock, AR - Full-time – Not a remote position

Global C2 Integration Technologies is looking for talented and enthusiastic Data Link Operations Manager in **Little Rock, Arkansas**. You will be responsible for providing support to the 19th Airlift Wing through technical and operational means, enabling integration of data link sources, architecture, combat identification (CID) and track amplification. Candidate must have relevant expertise with a background in Data Link Operations (DLO) with an understanding of systems interface, architecture, and troubleshooting. Duties include, but are not limited to:

Responsibilities:

- Provide oversight on security, certification, and accreditation requirements; resolve data formatting, translation and interoperability issues
- Deliver unique and exquisite sources of data to support the timely, accurate, and complete transmission of tactically actionable information, to include friendly, neutral, and CID requirements
- Provide expertise in the interpretation and publication of Operational Tasking Data Links (OPTASKLINK); when not available, provide alternate reporting through beyond line of sight/line of sight radios and antennas, RF antennas, SATCOM systems, deployable C2 kits, and other commercial-off-the-shelf options
- Possess expertise and breadth of knowledge in drafting, editing, routing and adhering to local tactics, techniques, and procedures (TTP), as well as Military Standard (MILSTD) and Air Force Instructions
- Input tactical information into the Joint Data Network through tactical data link operations, demonstrating strict adherence to TTPs, theater guidance, and security requirements, while providing support to real-world and training operations

Minimum Skills Required:

- 2-5 years experience with data link operations and systems architecture
- Understanding of networking and common/terminal data links
- Ability to troubleshoot connectivity issues and resolve, utilizing a team approach when necessary
- Operational experience in data link maintenance, operations and airborne terminology
- Maturity to work unsupervised, supporting customer requirements during real-world and exercise events
- Ability to communicate effectively with customers and corporate program managers
- Develop and maintain relationships with customers, base-level communications support elements and program management offices

Desired Skills:

- Joint Interface Control Officer experience
- System architecture maintenance and troubleshooting experience
- Prepare briefings to communicate network operations in clear and concise terms to military, IC partners, and other stakeholders

Eligibility:

- Must have a Secret U.S. DoD Security Clearance
- Must be eligible and willing to upgrade to a TS/SCI Clearance

Global C2 Integration Technologies is proud to be an Equal Opportunity Employer. Our employment practices provide equal opportunity for hiring, promoting, and training without regard to race, religion, color, sex, gender, national origin, age, United States military veteran's status, ancestry, sexual orientation, marital status, family structure, medical condition including genetic characteristics or information, veteran status, or mental or physical disability so long as the essential functions of the job can be performed with or without reasonable accommodation, or any other protected category under federal, state, or local law.

Job Type: Full-time
