

## **ISSO / Compliance Manager**

Global C2 Integration Technologies is seeking an experienced cyber security professional to join our team as an Information Systems Security Officer (ISSO) / Compliance Manager.

### **Requirements**

- **Work onsite at our Las Vegas location** providing corporate expertise in information and computer system security.
- These efforts include, but are not limited to: authorization packages to obtain Authorizations to Operate and Connect, preparation of information and artifacts for IATT/ATO/ATC submission, management of risk and conducting risk assessments, conducting annual security reviews and scans, and reporting security posture of networks and information systems.
- Ensure IT systems are in compliance with the requirements of the Risk Management Framework (RMF), National Institute of Standards and Technology Special Publications (NIST SP), and Federal Information Processing Standards Publication (FIPS).
- Generate and maintain System Security Plans, support Continuous Monitoring (CM), and create Plans of Action and Milestones (POA&M) for non-compliant and non-applicable controls.
- Corporate Cybersecurity Maturity Model Certification (CMMC) lead to ensure requirements and certifications established. CMMC is a new cybersecurity framework and accompanying certification by the DoD, which includes requirements from NIST 800-171, the FAR 52.204-21, and beyond.
- The ISSO assists with the management of security aspects of the information system and works closely with the engineering team and system administrators to support day-to-day security operations of the system.
- The ISSO will perform crucial weekly continuous monitoring and audit log reviews, backup operations, and anti-virus definition updates.
- The ISSO provides support to the customer on matters involving the security of the information system and assists in maintenance to ensure the system accreditation is maintained. This includes developing and updating the system security plan, POA&Ms and supporting artifacts, as well as managing and controlling changes to the system and assessing the security impact of those changes.
- The ISSO also provides support to plan, coordinate, and implement IT security programs and policies and provides configuration management for security-relevant information system software, hardware, and firmware.

### **Qualifications**

- Bachelor's Degree in Computer Science or related field and at least 6 years of relevant experience, or equivalent
- Candidate must provide evidence of DoD 8570 compliant: CISSP, GSLC CASP+, CISM, Sec+ and/or other equivalent Security IAM/IAT II Certification.
- Active Secret clearance
- Experience with vulnerability and compliance scanning tools (SCAP, Nessus, etc.) and eMASS experience
- Experience implementing and monitoring with the Risk Management Framework (RMF)

- Experience managing and hardening Windows 10 / RHEL based operating systems
- Strong investigative drive
- Self-motivated individuals with ability to work in a team environment
- Strong written and oral communication skills
- Understanding of system vulnerabilities, exploitation, and vulnerability mitigation
