

Mid-level Software Developer

Dayton, Ohio | Full-time | Possible Hybrid remote/in-office work

Global C2 Integration Technologies (GC2IT) is looking for a highly skilled and motivated Mid-Level Software Developer to join our growing team. This is an exciting opportunity to contribute to mission-critical projects, leveraging your expertise in full-stack development, cloud technologies, and DevOps practices to create scalable, high-performance applications.

Key Responsibilities:

- **Full Stack Development:** Design, develop, and maintain both front-end and back-end components of web applications, ensuring they are scalable, performant, and secure.
- **Collaboration:** Work closely with cross-functional teams including UX/UI designers, product managers, and other developers to deliver high-quality software solutions.
- **Code Reviews:** Participate in code reviews, providing constructive feedback and ensuring adherence to coding standards and best practices.
- **Architecture & Design:** Contribute to architectural decisions, design patterns, and technology stack choices to meet business requirements.
- **Testing & Debugging:** Implement automated testing frameworks and debug complex issues to ensure high-quality code.
- **Continuous Improvement:** Stay updated with emerging technologies and development trends, continuously improving the development process and suggesting enhancements.
- **Documentation:** Create and maintain technical documentation for architecture, design, and code to support ongoing development and maintenance.

Technical Stacks:

- **Front-end & Back-end Development:** Proficiency in modern front-end frameworks (React.js, Angular) and back-end technologies (Node.js, Java, .NET Core, Python) for building scalable and secure applications.
- **Infrastructure & Tools:** Experience with cloud platforms (AWS), DevOps practices (CI/CD pipelines, containerization), database management (SQL, NoSQL), test automation, and version control systems.

Qualifications and Experience:

- ✓ **Education:** Bachelor's degree in Computer Science or a related field.
- ✓ **Experience:** 5+ years of experience in full stack development

- Technical Skills:
 - Proficient in front-end technologies such as HTML5, CSS3, JavaScript, and frameworks like React.js or Angular.
 - Strong back-end development skills in languages like Java, Python, Node.js, or .NET Core.
 - Experience with database design and management, including SQL and NoSQL databases.
 - Familiarity with cloud services (AWS) and experience deploying applications in a cloud environment.
 - Knowledge of DevOps practices including CI/CD, containerization (Docker, Kubernetes), and version control (Git).
 - Experience with test automation frameworks and tools.
 - Experience with APIs to support Low-Code/No-Code Development Platform models
 - Experience using low-code/no-code business process modeling notation (BPMN) tools and experience developing application/process automation software based on BPMN models
 - Experience using software tools such as Appian, Salesforce, Nintex, etc. with Microsoft SQL Server database and Microsoft .NET development environment
 - Experience in agile and hybrid low-code application development

Preferred Qualifications:

- Experience with Agile development methodologies.
- AWS Certified Solutions Architect.
- Experience with micro-services architecture and RESTful API design.

Salary Range: \$95—\$105K based on qualifications and experience.
